Gurgaon, India | 8101379235 | dinchusasonian10@gmail.com | linkedin.com/in/dinchen-lepcha

Summary

Data-driven professional with 2+ years in Training & Quality operations, specializing in MIS reporting, dashboard development, KPI tracking, and reporting automation. Skilled in Advanced Excel, Google Sheets, SQL, Power BI, and Google Apps Script, with hands-on experience building automation tools that consolidate multi-department data and using AI APIs to generate leadership-ready summaries. Actively building analytics engineering skills (SQL, Python, data pipelines) through self-directed projects, with a track record of reducing manual reporting effort while improving accuracy and turnaround time.

Technical Skills

Languages/Query	SQL, Google Apps Script (JavaScript)
Analytics Tools	Advanced Microsoft Excel, Google Sheets, Power BI
Automation	Google Apps Script, Groq API (LLM integration), Google Chat Webhooks
Reporting	MIS Reporting, KPI Dashboards, Business Reporting, Data Validation
Core Skills	Data Analysis, Data Cleaning, Root Cause Analysis (RCA), Stakeholder Management

Professional Experience

Samast Technologies Pvt. Ltd. (Magicpin)

Senior Associate – Training & Quality

Gurgaon, India

Apr 2024 – Present

- Built an AI-powered reporting tool using Google Apps Script and the Groq API that consolidated 10+ scattered department-wise report screenshots into a single Google Sheet and auto-generated plain-language summaries, enabling leadership (up to CEO and business heads) to grasp performance shifts without manually reviewing each screenshot.
- Designed and maintained separate performance dashboards for Tele, Feet-on-Street, and Field teams, tracking KPIs including calls done, meetings scheduled/held, cash collection, targets, and market coverage.
- Automated report delivery via Google Chat webhooks, formatting multi-department summary tables for consistent, leadership-ready posting across channels.
- Managed and analyzed operational datasets for 2,000+ agents using Advanced Excel and Google Sheets, performing data validation and reconciliation to ensure reporting accuracy.
- Prepared daily, weekly, and monthly MIS reports and ad-hoc scorecards for leadership, cutting manual reporting effort by an estimated 30–40% through workflow automation.
- Conducted Root Cause Analysis (RCA) on operational and quality trends, translating findings into recommendations that supported business planning.
- Partnered with Operations, Product, and Business teams to consolidate data from multiple sources into centralized trackers and reporting templates.

Personal Projects

Personal Finance Analytics Dashboard

Self-Directed

- Built a full personal finance web app from scratch (HTML, CSS, JavaScript) to track income, expenses, and spending trends without relying on third-party finance apps.
- Implemented a month-rollover system and transaction ledger with persistent local storage, allowing continuous tracking across months without data loss.
- Integrated Chart.js to visualize spending patterns and category-wise breakdowns, translating raw transaction data into actionable visual insights.

Automated Report Delivery System (Google Chat Webhooks)

Self-Directed

- Built a Google Apps Script tool that formats and posts operational summary tables directly into Google Chat, using monospaced formatting and double-header rows for clean readability on mobile and desktop.
- Designed a HEADER_MAP configuration system to shorten and standardize long column headers automatically, keeping tables compact and readable within Chat's width constraints.
- Solved formatting edge cases around column width and alignment to ensure tables rendered consistently across different report types and data volumes.

Education

Bachelor of Arts (B.A.), University of Delhi – Ram Lal Anand College

2023
